# Gaurav Goel

ANDROID DEVELOPER

## HELLO !

My name is Gaurav Goel, I have been in the Mobile Development field for 2 years now with extensive experience in Android and Java Technologies. Currently enrolled at Conestoga College, Waterloo for an IT program Mobile Solutions Development (Co-op). Actively looking for a full time Co-op work term during winter 2020 in the Mobile Application Field to apply my knowledge and development skills.

## EXECUTIVE SUMMARY

Have good working experience in native Android Application development using Java and adapting Kotlin recently; Java Development using Core Java, Swing, JavaFX, SPRING framework, MVC, Web services, JDBC, Servlets, JavaScript, JSON Technologies.

Have hands on experience in Web Development using HTML5, CSS3, Vue.js and database programming with SQLite for Android, MySQL and SQL Server.

Have worked on WPF applications using C# in Visual Studio.

Created high fidelity Prototyping using Axure RP 9 for web site requirements.

Have been working with Azure DevOps Cloud service and GIT for project repository during my term at Conestoga College.

Fast Learner of new technology and can bring them into practice with perfection. Excellent communication, interpersonal and problem-solving skills. Highly motivated and extremely passionate about resolving problems with a positive attitude and excellent attention to detail.

Keen interest in Android Application Development; possess sound skills in J2EE/Android Programming.

## PROFESSIONAL EXPERIENCE

**ANDROID DEVELOPER:** CLASSYSYS PTE LTD, Based in Singapore

### Tailor Pro

Nov 2017 – Dec 2018

Tailor Pro is a mobile application for a client owning clothing business where we developed the application for the customers to be able to try all the fittings on a 3d Mannequin. The models were developed using JavaFX and JOGL (Java Open Graphics Library). 3d models of a Human Mannequin are loaded on screen with textures to try how different clothes will look after wearing. The models can change images, scale and rotate 360 degrees along X, Y & Z axis.

### PickUp Guy Android Application

May 2017 – Nov 2017

PickUp Guy caters three functionalities: 1. Booking a bike ride for a single seat journey. 2. Courier service with Zero stoppage from source to destination. 3. Food/Goods ordering from a given source to user location.

Portfolio of Applications is included in my LinkedIn Profile. Please scan QR code for details.
